

CUT YOUR UNLOADING TIME BY 40% & SLASH LABOUR COSTS – EVERY SINGLE DAY

CUSTOMER: Scrap recycling MSME supplying automotive OEMs

CHALLENGE: Unloading metal scrap from standard trucks was slow and labour-intensive, taking almost an hour per load. Workers remained idle during long unloading cycles, increasing monthly labour costs and causing delays in subsequent dispatches.

SRCC SOLUTION:

- ✓ Deployed SRCC-owned hydraulic tippers for the customer's regular scrap movements.
- ✓ Provided trained drivers to ensure fast, safe positioning and smooth unloading.
- ✓ Integrated the unloading sequence into the customer's yard workflow to eliminate bottlenecks.

KEY VALUE FOR MSMES:

- **Time saved:** Faster turnaround keeps operations flowing.
- **Labour cost reduced:** Less idle time means fewer wasted man-hours.
- **No equipment investment:** Customer benefits from SRCC's specialised fleet without capital expenditure.

TESTIMONIAL:

“With SRCC's tippers, unloading is quick, my staff gets back to work faster, and I save real money every month.”

– Owner, ABC Scrap Traders

METRIC	BEFORE SRCC	AFTER SRCC	CHANGE
AVG. UNLOADING TIME	80-120 mins	2-3 mins	~97% Faster
YARD CREW IDLE TIME	High	Minimal	Major cut
LABOUR COST / MONTH	₹50,000	₹0	Full Savings
